About

The label AMBIVALENZ was established in 2012 by Malte Grieb in Berlin. It is no coincidence that it was born in the city. The versatile furniture from AMBIVALENZ responds directly to the special requirements of urban space: flexible, space-saving and as creative as its inhabitants. It adapts to changing circumstances of the modern lifestyle.

In times when tiny houses and other micro-living concepts are booming, consumers demand furniture that creates maximum function in minimum space. This need is fulfilled by the flat, minimalistic Fläpps folding furniture. From wall desks to chairs, Fläpps makes small rooms look big and supports multiple charming uses. When unfolded, the furniture offers comfort and functionality; when folded, it disappears inconspicuously and flat against the wall. All Fläpps items are manufactured in Berlin.

The Fläpps Wall System

The new Curt sofa system is just as simple as it is original, with a single modular form that allows freedom of design. Curt means the freedom of not having to commit. With modules connected by a strap, Curt can be rebuilt, extended or changed in color as desired.

Our adaptable, innovative furnishing solutions fit perfectly into the hybrid spaces of today, in which conventional boundaries between living areas are dissolving. They are in demand in both residential and commercial sectors. Whether in a single apartment, a hotel or a co-working space, the minimalistic furniture is most striking in use. Because with AMBIVALENZ the motto is always: strikingly restrained.

The Modular Curt Sofa System

Individual Finish

Fabrics

Curt is available in 4 different fabrics with different fields of application. Jet is a very durable/resilient polyester fabric, our Barcelona fabric is a soft velvet. Dama consists of recycled wool and Sera fabric is a high-quality wool fabric.

Customization

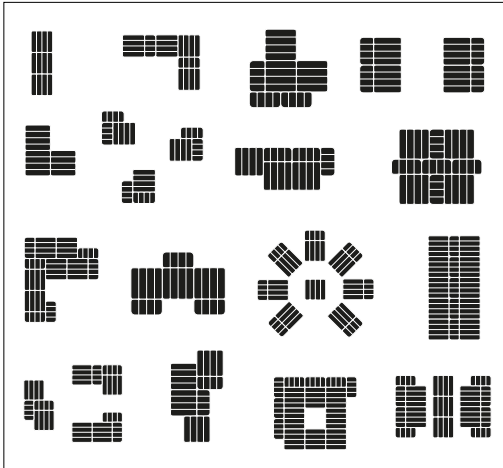

Curt offers you indefinite options in so many different ways. All fabrics are available in different colors. And the color of zippers, belts and buckles can be customized aswell. With Curt there is no limit to your creativity.

Your fabric is welcome

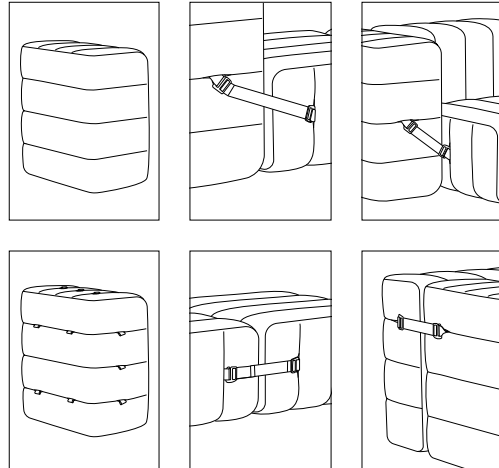

If you fancy a fabric, that we do not offer regularly, it is possible to use an individually picked one with a surcharge. If you have a textile brand in mind you can pass us their information or simply bring your own textile to the table.

Dimensions and Compositions

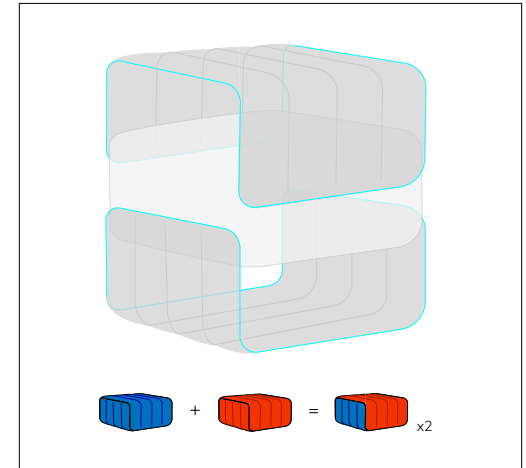

Infinite Possibilities

This infinite variety is created by only one single modular form. A cuboid with a square base whose height is half the length of its sides. In addition 16 hidden connection loops, only visible when needed. So simple, so infinite.

Connection Types

Curt is based on a flexible connection system, which consists off an adjustable strap with two simple hooks. There are three attachment loops on each side of the module and four on the back for hooking in.

Removable Covers

Two rectangles, formed into a U, which can be joined and divided with a full length zipper. Removable, exchangeable, dividable, combinable and easy to clean.

Cushion

Barcelona

Jet

Sera

Dama

The Curt sofa cushion was specially developed for the Curt sofa system and fits perfectly to it. Both aesthetically and ergonomically, it perfectly complements the modular Curt sofa. When sitting, it supports the back in exactly the right place, when lying down, the head can be happy about a gentle resting place. This way, the cuddly cushion makes the Curt couch even more comfortable. And more flexible too, because in addition to the already infinite configuration options of Curt, the sofa cushion gives further scope for creative AMBIVALENZ. Infinite X Infinite, so to speak!
